

Lecture and Notes Day

1. Hook & Connect	What is the story and why should it matter to your students? This could be a story, picture, video, sound byte, or even a question or problem to discuss and reflect upon.
2. Content Delivery	What are your 3-5 main points you want EVERY student to walk away understanding/having learned? What examples or models do you have to go with each point? How can they connect those to stories or their experiences? How will student INTERACT with the content beyond just listening? Beyond just writing notes? As the expert, what will you MODEL?
3. Closure	How will students summarize the information with their own thinking? <ul style="list-style-type: none">• Questions prompts & discussion?• Exit strategy with a reflection• Articulate-Why should I care or this matter?
4. Application or Use of the Information	How will students use the information from the lecture? Why did I spend 40 minutes listening to the teacher talk????

Tools and resources for considerations:
